

Farm Safe - Nature Farm

Did you know that farmers can join schemes funded by the Rural Development Programme 2014-2020, where they are encouraged to carry out measures on farms that are good for the environment and Biodiversity?

Fencing off rivers and streams to prevent farm animals entering them keeps them clean. Clean rivers are important homes for fish, and drinking sources for birds and other wildlife.

Send a picture of your masterpiece to info@nationalruralnetwork.ie before May 22nd.
